# Windows 8 update

Users of Surface tablets will notice less changes. This is good to keep your operating system up to date and we recommend that you leave it at that. On this same screen you find: Search for updates: By clicking on it Windows will check if there are no new updates to install on your system; Change settings: You can change the way Windows manages checks, downloads and upgrades, such as: Install updates automatically: it's the recommended option, because Windows is the one who manages updates in an automated manner; Download updates, but allow me to choose when to install them: Every time you have updates on the Microsoft network for your Windows, the system will download, but will not install automatically. If when you enter this screen you see the message "Your computer is set to install updates automatically, it means that the Windows itself will manage the downloads of updates and install them automatically. Microsoft is calling this update "mandatory" for all Windows 8.1 computers. Anyone who does not update the system will not be able to receive more future updates. Therefore, Windows 8.1 will be able to identify the hardware on which it is installed to adapt the system, improving the use of mouse and keyboard or touchscreen. If you don't know if Windows 8 or Windows 8.1 is configured to check, receive, and update the operating system, we'll discuss in this article how to check this quickly and even if you have any problems with Windows Update. 1. Go to the Windows control panel. In addition, failing to install this version of the platform will prevent Windows Update from resolving problems on the PC. In the Run box that appeared, type control and click OK. 2. The changes in the interface are restricted, for the time being, to the contextual menu adjuces me e etadpu olep erucorP .sadauegdani majetse etadpu swodniW od seApAAsApo sa euq res edop .oAAsAmaicxe moc olerama enocAA mu rev e swodniW od seApAAsAazilauta erbos alet an revitise AAcov odnauQ.ametsis ues me aAsAnaruges ed sameiborp revlonve edop etadpu swodniW on amelborp reuqluQetadpu swodniW od sameiborp odnoloseR.mAAbmat seApAAsAazilauta sa rebecor massop .olpmese rop .ceiffo o omoc .IfosorciM ad sotudorp sortuo euq arap rarugifnoc edop mAAbmat AAcov.oAAsApo atse odnazilliu ametsis od sosruceR e sovitaclipa revomer uo ranocid levAAsop AAcov swodniW od seApAAsreV satrec mE :8 swodniW os sosruceR ranocidA.setna adalatsni res oAAsAazilauta artuo rop odnarepse etnemlamron .ametsis on satluco macif e sadalatsni marof oAEn adnia euq seApAAsAazilauta sa oAAs .satluco seApAAsAazilauta rarutseR.AAAcehlateDAAAe oAAsAazilauta odnehlisce e esuom od oAEn oAEn o moc odnacic .oAAsAazilauta ad sehlated so rev edop AAcov .ametsis ues me salatsni e sadaxiab Aa seApAAsAazilauta sa sadot atsil .seApAAsAazilauta ed ocirAAtsish ribixE.aAsAnaruges od oAAsAazilauta atse ruzilliu odanemocer AAcov oAEn .swodniW od etadpu swodniW on sameiborp revloner e rarugifnoc .ravita a adnerpA .sueda AAd PX swodniW o euq me atad ansem .ejoh levAAnopsid etnemlaicifo es-unorot 1.8 swodniW od 5539192BK etadpu O A .sorrac arap erawifos ed etnecno mu mAAbmat e rerolpxE tenretni o arap sedadivon .anatroC etnestsisa o omoc .8 enohP swodniW arap sedadivon uortsom alledaN aytas ovitucexe-etnediserp ovon o euq me 4102 diuB otneve o etnarud .adassap anames an etadpu o uoicnuna IfosorciM A oduTheT :otoF AAAe )IfosorciM/oAAsAazilauta odnoloseR .otoF( 4102 dliuB otneve me .IfosorciM ad ovitucexe-etnediserp ovon .alledaN aytas oduTheT :otoF AAAe )IfosorciM/oAAsAazilauta odnoloseR .otoF( 4102 dliuB otneve me .IfosorciM ad ovitucexe-etnediserp ovon .alledaN aytas 4 ed 1 .roirefni e roirepus arrab odnahnag .potksed o moc sovitaclipa sod rohlem oAAsAazilauta amu a e esuom od euqilo o na opAAsAazilauta eAAWindows UpdateeAA.3. Ao contrArio de updates comuns de Microsoft operating, the package is mandatory and brings several changes that directly impact on the way the software is used. According to Microsoft, the update is mandatory for Windows 8.1 users to receive future updates. Several of the improvements will only be possible for users of desktop PCs or notebooks. This novelty will only arrive in a later update, whose date has not yet been set. Therefore, a notification should be displayed on the screen of all users already in the next few days. The system will not check or warn you about system updates. 4 of 4 Files must be installed individually, if the user does not wish to wait for the complete package (Photo: Reproduction/Paulo Alves) eAA Photo: TechAll Files must be installed individually, if the user does not wish to wait for the complete package (Photo: Reproduction/Paulo Alves) Photo: TechEverything To complete the installation, the users should select the correct version for their machine, download the files individually and run one by one on the computer. You will need to access Windows Update and check the updates you want or need to install manually.Look for updates, but allow me to choose when to download and install them: Windows will check for new updates and warn you only, not downloading or installing them on your computer;Never check if there are updates: This option will virtually disable Windows Update. For those who wish to get ahead, it is already possible to download the update for 32- or 64-bit Windows computers directly in TechAll Downloads emAA Update (KB2919355). Among the improvements are a greater integration between the Modern interface (old Metro) and the desktop, in addition to enhanced usability with mouse and keyboard.
